

Assignment Bash/Terminal

Name: Anderson(Han Lin Yeh)

Data: 1/25/2025

Question 1: (10 Points)

What is the difference between shell and bash?

Ans:

A shell is a command-line interface that allows users to interact with the operating system by running commands, executing scripts, and managing processes.

A bash is a kind of shell, most used in Linux and macOS systems.

Question 2: (10 Points) To respond to this question, you need to use terminal/Bash and have a screenshot of your terminal/bash.

1. What is your home directory?

Ans: /c/Users/user

2. What files/folders exist in it?

Ans:

```
user@LAPTOP-PILMMRVH MINGW64 /c/data-613
$ echo $HOME
/c/Users/user

user@LAPTOP-PILMMRVH MINGW64 /c/data-613
$ ls ~
AppData/
'Application Data'@
Contacts/
Cookies@
Desktop/
Documents/
Downloads/
Favorites/
Links/
'Local Settings'@
Music/
'My Documents'@
NTUSER.DAT
```

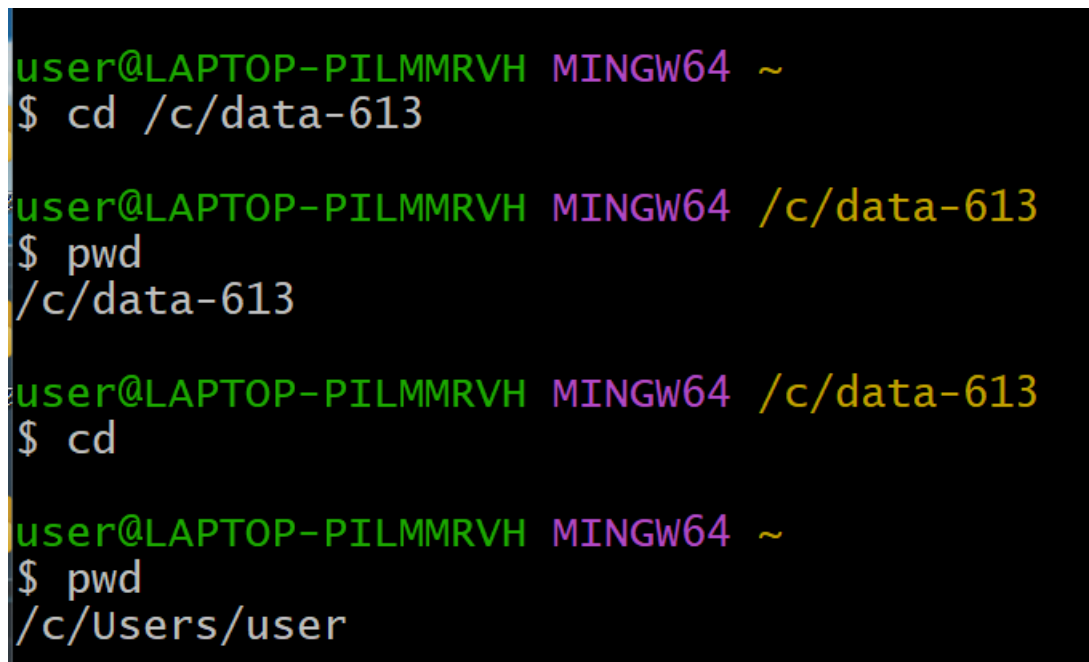

Question 3: (10 Points) To respond to this question, you need to use terminal/Bash and have a screenshot of your terminal/bash.

1. Where does the command ``cd../..`` take you? Run the command ``pwd`` and explain the output!

Ans: The command ``cd../..`` moves up to two levels in the directory path. The command ``pwd`` shows the current path.

2. What does the command ``cd`` do? Run the command ``pwd`` and explain the output!

Ans: The command ``cd`` takes me to the my home directory. The command ``pwd`` shows the current path.

```
user@LAPTOP-PILMMRVH MINGW64 ~
$ cd /c/data-613

user@LAPTOP-PILMMRVH MINGW64 /c/data-613
$ pwd
/c/data-613

user@LAPTOP-PILMMRVH MINGW64 /c/data-613
$ cd

user@LAPTOP-PILMMRVH MINGW64 ~
$ pwd
/c/Users/user
```

Question 4: (10 Points) To respond to this question, you need to use terminal/Bash and have a screenshot of your terminal/bash.

Read the manual page of `ls`. What does the `-a`` flag do? What does the `-l`` flag do?

Ans:

```
user@LAPTOP-PILMMRVH MINGW64 ~
$ ls --help
Usage: ls [OPTION]... [FILE]...
List information about the FILES (the current directory by default).
Sort entries alphabetically if none of -cftuvSUX nor --sort is specified.

Mandatory arguments to long options are mandatory for short options too.
  -a, --all                do not ignore entries starting with .
  -A, --almost-all        do not list implied . and ..
  --author                 with -l, print the author of each file

                        used only with -ls and per-directory totals
  -l                        use a long listing format
  -L, --dereference        when showing file information for a symbolic
                           link, show information for the file the link
                           references rather than for the link itself
```

Question 5: (A and B each have 5 points, and C has 10 points. The total is 20 points.) To respond to this question, you need to use terminal/Bash and have a screenshot of your terminal/bash.

1. Create a folder within your home directory, which was identified in Question 2, and name it 'temp_bash'.
2. Create a new file using the command `touch` and name it `myfile.txt` inside the new folder `temp_bash` and run `ls` to show that the file is inside the folder.
3. Run the `stat myfile.txt` command and explain the information retrieved from the output. Here is an example of what should be included in the output and a brief explanation for each part.

- ``Blocks: 0`` The number of blocks for the file.
- ``IO Block: 65536`` The size of each block.

```
user@LAPTOP-PILMMRVH MINGW64 ~
$ mkdir ~/temp_bash
$ cd ~/temp_bash
$ touch myfile.txt
$ ls
myfile.txt
$ stat myfile.txt
stat myfile.txt
  File: myfile.txt
  Size: 0          Blocks: 0          IO Block: 65536  regular empty file
Device: 6ac13ccbh/1791048907d  Inode: 562949954065756  Links: 1

 Birth: 2025-01-24 15:46:17.962768500 -0500
```

Question 6: (40 Points) To respond to this question, you need to use terminal/Bash and have a screenshot of your terminal/bash.

1. Use the command ``>>`` and add the following line `This line is my first line`. Now add the following line `This line is my second line`. Then, run `cat myfile.txt` to show that the line has been added.
2. Copy the file `myfile.txt` to file `copy_myfile.txt` with the command ``cp``
3. Use the command ``>`` and add the following line `This line is a new line` to `copy_myfile.txt`. Then run `cat copy_myfile.txt` to show the line is added.
4. Explain the difference between ``>`` and ``>>`` based on the result of the Question 6.

```
user@LAPTOP-PILMMRVH MINGW64 ~/temp_bash
$ echo "This line is my first line." >> myfile.txt
$ echo "This line is my second line." >> myfile.txt
$ cat myfile.txt
This line is my first line.
This line is my second line.
$ cp myfile.txt copy_myfile.txt
$ echo "This line is a new line." > copy_myfile.txt
$ cat copy_myfile.txt
This line is a new line.
```

Ans: `>>` is used to append an existing file and `>` is used to overwrite an existing file.
